WHOLESALE PRICE LIST 3320

SEASON 1933-1934

December 1, 1933

PLEASE NOTE

All summer quotations not accepted to date are hereby cancelled.

Terms. To buyers of known or established credit, 60 days from date of invoice. Otherwise cash with order or 25% with order, balance C. O. D.

Grading. Plants that are wider than tall are graded by width.

Quantities. Five or more plants of one kind and size will be supplied at 10 rate; 25 or more at 100 rate; for less than 5 of one kind and size add 20% to 10 rate.

Pots. Prices of pot-grown stock do not include pots and unless otherwise instructed plants will be shipped without them. If wanted in the pots they will be charged for at cost, but may be returned and credit will be given.

Prices. All prices herein are strictly net, to the trade only and for goods at our nursery unless otherwise stated. This list means what it says both as to prices and terms and we do not deviate from it.

Packing. At cost as usual, including paper pots if used. Plants will be packed to secure lowest possible freight classification consistent with the nature of goods shipped. Packing free if cash comes with order.

Shipping. Our responsibility ceases when goods are delivered to transportation company in good order. They travel at buyer's risk. Please state distinctly whether you wish goods shipped by freight or express and where water shipment is possible be sure to specify by water or rail as you may prefer.

Complaints. Must be made within 10 days after buyer receives the goods.

Other Stock. This list covers stock for shipment from our San Jose Nursery. We also act as selling agents for several other growers so shall be glad to have inquiries for any material grown on the Pacific Coast but not listed herein.

Code. If any state or national code be adopted which is contrary to any conditions specified in this list, the code will prevail from date of its adoption.

This firm is a member of

CENTRAL CALIFORNIA NURSERYMEN'S ASSOCIATION.
CALIFORNIA ASSOCIATION OF NURSERYMEN.

Novelties and Scarce Items

Special attention is called to the following interesting lines. Sizes, prices and descriptions in the corresponding divisions of this list.

COTONEASTER praecox
COTONEASTER Standards (in variety)
CYTISUS scoparius andreanus
ILEX: Dutch, Van Tol, Variegated and Chinese
ITEA ilicifolia
OSMANTHUS aquifolium and fragrans
PHOTINIA serrulata nova
PYRACANTHA formosana splendens
PYRACANTHA rogersiana aurantiaca
RAPHIOLEPIS indica rosea

FLOWERING FRUIT TREES

APRICOT, Japanese erect and weeping
CHERRIES, Japanese erect and weeping
PEACHES, 3-colored trees and weeping
PLUM blirieana

DECIDUOUS TREES

ACER negundo argenteo-variegatum
BETULA pendula youngi
CRATAEGUS carrierei
CRATAEGUS cordata
GINKGO biloba
LABURNUM vossi
POPULUS tremula pendula
ROBINIA hispida macrophylla
SORBUS aucuparia pendula

DECIDUOUS SHRUBS

CYDONIA japonica, New varieties
MAGNOLIA liliflora nigra
SYRINGA, Named Lilacs

CLIMBERS

HEDERA canariensis variegata
TRACHELOSPERMUM jasminoides
WISTERIA: Pink and Double Purple
WISTERIA, Extra Long Japanese
WISTERIA, 4 new varieties from Japan
WISTERIA Standards (tree shaped)

MISCELLANEOUS

HESPEROYUCCA whipplei
MUSA arnoldiana

Lining Out Stock

Although we have considerable material of this class, particularly high grade grafted conifers, we have decided not to include it here but to issue a special list of it along toward spring. Should you wish quotations sooner we will gladly give them on request.

Abbreviations

It is important for buyers to know whether they are getting seedlings or cuttings, etc., so we have shown how every item was propagated using the following abbreviations:

B—budded

C—cuttings

G—grafted

S—seedlings

CONIFERS

Note—A large proportion of our conifers are grafted on seedling roots which gives them a far better root system than when grown from cuttings. We call particular attention to grafted conifers offered in 4 in. pots. These were grafted on 2½ in. pot stock and transplanted to 4 in. pots so now have had a full season's growth. Some are 2 years from graft. This gives them an excellent root system and makes them far better and more profitable for growing on than newly grafted stock in 2½ in. pots. We use this 4 in. pot stock for our own planting and can recommend it highly to our customers. Much of it is large enough for retail sales.

Unless otherwise stated all plants in this section will be balled at prices quoted.

To Eastern Nurserymen

who have not been buying from us.

YOU SHOULD LOOK THROUGH THIS LIST CAREFULLY. While it contains much that is not adapted to climates more severe than ours, it also offers many things that thrive East but are not obtainable there or which can be propagated much better and more economically here.

If you have not bought of us before it may seem strange to send to the Pacific Coast for nursery stock, but many others are doing so EVERY YEAR to such an extent that our eastern business has gained steadily for several seasons.

Spring shipment to any eastern point is perfectly safe and practical via Southern Pacific R. R. to New Orleans, thence by rail, if destination is inland, or via steamer to Atlantic Coast points. We know how to pack properly for the long trip. The freight rate is just the same as if shipped direct over the mountains. This plan enables us to ship about March 1st while stock is still dormant here, and it will arrive in good time for your spring selling season.

On account of its weight, we do not recommend "balled" stock, but freight is not serious on deciduous and pot-grown items.

Your attention is called particularly to the following lines:

JAPANESE FLOWERING CHERRIES (both erect and weeping)

FLOWERING FRUIT TREES in general

SEQUOIAS including *S. gigantea pendula*

COTONEASTERS (bush and standard)

MAHONIA bealei

ILEX—Grafted Hollies, pot grown

PYRACANTHA, various kinds

BIRCHES, Cutleaf and Young's Weeping

GINKGO biloba

HAWTHORNS Paul's, Carrierei, etc.

LABURNUM vossi

MAPLE Schwedler's

PAULOWNIA

ROBINIA hispida *macrophylla* (Standards)

CYDONIA, rare Japanese Flowering Quinces

LILACS, finest named varieties

MAGNOLIA, deciduous

IVY, Yellowedge Algerian

WISTERIA (climbers and tree-shaped)

Birches, Hawthorns, Maples, and Robinia hispida *macrophylla* can be supplied in car-lots and special rates for such quantities will be quoted on request.

Altho we do not list them herein we can always supply Boxwood Globes and Pyramids, Date Palms and Kentia Palms in carload lots. If interested write for current prices.

We solicit inquiries for anything in the nursery line produced on the Pacific Coast.

W. B. Clarke & Co.

who have not been living here

It is a common mistake to suppose that the people of the East are not interested in the progress of the West. On the contrary, they are very much interested, and they are very much interested in the progress of the West.

Lilacs

Named Varieties

We have tested about 150 varieties and gradually eliminated all but the very best sorts. All are grown by budding and as we pinch them when only a few inches tall they are all well branched and practically all bloom from first season on.

Named varieties of lilacs are divided into two groups, Special List and General List.

Sizes available for each variety are indicated by letters A, B, C, etc., following names in variety list below.

SPECIAL LIST

	10 rate	100 rate
5 to 6 ft. (indicated by D).....	1.00	.90

4 year G.....	1.75	
3 year G.....	1.25	
2 year G.....	.75	
1 year G.....	.55	.50

multijuga longissima

EXTRA LONG JAPANESE WISTERIA

A variety of W. multijuga with astonishingly long clusters of light purple flowers. On a well established vine they will run 3 to 4 ft. in length. The original old vine frequently had them 4 to 5 ft. and very rarely they have actually attained 6 ft.

2 year G.....	1.00	.85
1 year G.....	.75	.60

multijuga rosea, PINK JAPANESE WISTERIA

These are genuinely pink. There seem to be inferior strains of so-called pink wisterias. All our propagation is from our own blooming plants which bear beautiful pink flowers in long clusters.

venusta (white) SILKY WISTERIA

3 year G.....	1.25	1.15
2 year G.....	.75	
1 year G.....	.55	

var. Mrs. McCullagh

A rare and very beautiful variety. Flowers large purple in compact clusters. The wood is very short-jointed making this the best variety where space is limited.

NEW VARIETIES

2 year G.....	1.25	
1 year G.....	1.00	
sinensis rubra (Beni Fuji) pink flowers, large clusters		
multijuga, Issai —purplish blue; flowers very young and freely.		
multijuga, Jako —white, very fragrant		
multijuga, Kyushaku —purple, 4 ft. clusters		

STANDARD WISTERIAS

A splendid novelty we recently put on the market. Stems are about 4½ ft. tall (a foot taller than the usual Standard Rose).

The pink listed below as extra heavy are genuine specimens with strong stems and 4 year heads. Most of them bloomed last spring and should again this coming spring.

The "regular" stock is of course much lighter but sufficiently developed to make a good showing.

extra heavy 4½ ft. stem.....	3.00
